REMARKS

In the Final Office Action, the drawings stand objected to as not showing every feature of the claimed invention. Further, claims 2-6, 8, 10-15, 17-24, and 26-27 stand rejected under 35 U.S.C. 102(b), as being anticipated by Jansen et al. (U.S. Patent No. 5,585,709). Further, claims 7 and 25 stands rejected under 35 U.S.C. 103(a) as being unpatentable over Jansen et al. in view of Boyer (U.S. Patent No. 4,485,796). Finally, the Examiner states that the Applicants' arguments on March 14, 2002 have been considered but are not persuasive.

Regarding the Examiner's objection to the drawings, Applicants have cancelled without prejudice the claims having the buried permanent magnet, here claims 15, 24 and 27. Reconsideration of the drawings in light of these changes is respectfully requested.

Regarding the Examiner's rejection of claims 2-6, 8, 10-14, 17-23, and 26 under 35 U.S.C. 102(b), as being anticipated by Jansen et al. Applicants have amended independent claims 2, 3, 10, 11, 17, and 18 to further include a plurality of rotor bars and to further include the limitation "wherein at least one of the sensing slots is not centered to a corresponding one of said plurality of rotor bars." Support for these changes is shown in Figures 1-8 of the originally filed drawings and as such do not constitute new matter. It is also respectfully submitted that these changes overcome the Jansen reference, as Jansen requires that each of the sensing slots be centered to a rotor bar to create its desired saliency. Reconsideration of 2-6, 8, 10-14, 17-23, and 26 is respectfully requested.

In view of the foregoing amendments and remarks, the Applicants submit that claims 2-6, 8, 10-14, 17-23, and 26 are all in proper form and patently distinguish from the prior art. Accordingly, allowance of the claim and passage of the application to issuance is respectfully requested.
